

SIREN

SARS-CoV2 Immunity & Reinfection Evaluation

18 June 2021

Dear SIREN participants,

Today marks the one-year anniversary of the first participant being recruited into SIREN! It's been an extremely productive year and together we have established an internationally recognised study that has produced world leading insights into tackling COVID-19. Thank you to you for your dedication and playing your part in this huge milestone.

We hope you enjoy **this video** looking back at an amazing year:

https://snapsurvey.phe.org.uk/siren/updates/20210618_siren_one_year.mp4

We have recently had a lot of questions from participants who have been with SIREN from the start and want to remain in the study. We are therefore delighted to announce that we have approval to extend follow-up for up to an additional 12 months. This means that if your site chooses to extend SIREN, you may be given the choice to continue taking part and will receive further communications soon.

Thank you for every test you have taken and every survey you have completed so far, SIREN wouldn't happen without you.

All the best,
The SIREN team at PHE
